PROFILE

I'm a telecommunications engineer with deep expertise in wireless networks, IT solutions and cloud technologies. Currently I perform the role of leading technical projects in the emerging private wireless space. Over the years, I've gained broad experience working with customers from a wide variety of sectors, from major mobile carriers, to industry, defense, enterprises and public critical communications sectors, across different continents, performing different roles, from hands-on lab testing and network integration, to architecture design, to technical project leadership.

Solving challenging technological problems while keeping the focus on the client is my main professional objective, a skill I've obtained after being involved at different stages of a technical project: from initial design discussions to production rollouts, and continuing production environment support.

As a geek, I'm always learning new things to expand my skills, specially through new certifications and keeping up with new technology trends. I love working on my own personal tech projects, from those involving software development or the ones where you have to play with cloud tools, trying new technologies means pushing my creativity looking to come up with solutions for real-world issues.

I like to combine deep technical know with honest, straightforward communication, with the final goal of assist customers to successfully design the right solution for their use cases.

WORK EXPERIENCE

Project Support Engineer - Nokia Spain — Madrid, Spain
August 2022 - Present

In my most recent role, I act as and end two end Technical manager for the Enterprises Organization in the European region. I took on the responsibility of end-to-end technical leadership for the design, deployment, and implementation of new 4G/5G private wireless networks for enterprises. This comprehensive role spanned across various components, including Radio Access, EPC/5GC CORE solutions, IP networking, and appliance services, showcasing my ability to manage complex projects from inception to completion.

I've been involved as technical leader for projects expanding a wide different variety of customers, including areas like: defense, major broadband carriers, enterprises, industry, critical communications. and public sector.

Radio Access Support Enginner - Nokia Spain — Madrid, Spain
January 2011 - July 2022

Radio Access Customer Support Engineer dedicated mainly to “Telefonica Moviles de España” as Nokia’s customer. Involved in tasks such as:
- 2G/3G/4G/5G/IoT lab testing and certification of new hardware, software, features and capabilities for products and solutions from the Nokia Radio Access portfolio.
- Technical support to the on production radio access network.
- Leading pilots projects for new product introduction (NPI).
- Software rollout.
- New features planning FOA.
- Network Integration support and 24/7 emergency support service.

Also, Involved on midterm customers projects, such as: O2 UK, AIDF Spain, O2 Germany, TMN Portugal, among others

Radio Access Support Engineer - Nokia Venezuela — Caracas, Venezuela
June 2006 - September 2010

Radio Access CARE support and NI Engineer, mainly in charge of 2G network deployment. Nokia BSC commissioning and integration for “Telefónica Moviles”, support tickets handling, 24/7 On Call emergency and software deployment. Midterm on-site support to the BSS implementation for projects in the Andean region (Colombia, Peru and Ecuador).

Six months of on hands training at the R&D Nokia Lab for NAM and LAT region, located in Dallas TX, USA.

CERTIFICATES

aws certified Solutions Architect ASSOCIATE

NOKIA
NCSS 5G Network Implementation Certification

LANGUAGES

SPANISH	native
ENGLISH	professional
PORTUGUESE	intermediate

ABROAD EXPERIENCE

PROFESSIONAL SKILLS

- 3GPP Radio Access
- 3GPP 4G/5G CORE Network
- Linux Systems
- AWS Architecture
- Cloud Tech
- IP & Networking
- Python
- Troubleshooting
- Docker / Kubernetes / openshift
- Traces Analysis
- 3GPP Networks Architect
